DETAILED ACTION

Allowable Subject Matter

Claims 1-110 are allowed.

This is the fourth allowance. For specific reasons for allowance, see the Office Action for the first allowance. In addition, see a reference cited in the previous Office Action: Reconfigurable cryptographic RISC microprocessor; Smyth, N. McLoone, M. McCanny, J.V. ; Amphion Semicond. Ltd., Belfast, Ireland; VLSI Design, Automation and Test, 2005. (VLSI-TSA-DAT). 2005 IEEE VLSI-TSA International Symposium on; Publication Date: 27-29 April 2005 On page(s): 29- 32. Abstract of this paper states: "To the author's knowledge, this is the first generic cryptographic microprocessor to be reported in the literature." This patent application was filed before that reference from 2005.

This fourth allowance became necessary because of newly filed prior art. The following is an examiner's statement of reasons for allowance: the newly cited prior art does teach or suggest the claims. As a whole, the prior art did not teach or suggest the particular features of the claims.
